*No, AT&T is not getting rid of SBC[["**8+1-888-769-5906**"]]
Global email, but it's now part of
the unified AT&T Mail [["**8+1-888-769-5906**"]]
service, meaning existing @sbcglobal.net,
@bellsouth.net, and @att.net users continue using their familiar addresses through att.net and
currently.com without interruption, though new [["**8+1-888-769-5906**"]]
accounts can't be [["**8+1-888-769-5906**"]]
created with the old domain. Users need to log in via the standard AT&T sign-in page
and might need to use a Secure Mail Key for third-party [["**8+1-888-769-5906**"]]
apps, as the system
is maintained by AT&T [["**8+1-888-769-5906**"]]
and Yahoo.*

email? SBCGlobal.net addresses remain
active under AT&T as [["**8+1-888-769-5906**"]]
legacy accounts, but changes in security, sign-

may eventually
shut down the [["**8+1-888-769-5906**"]]

updates, or account recovery issues occur. These concerns are [["**8+1-888-769-5906**"]]
